

Scope for the Management System

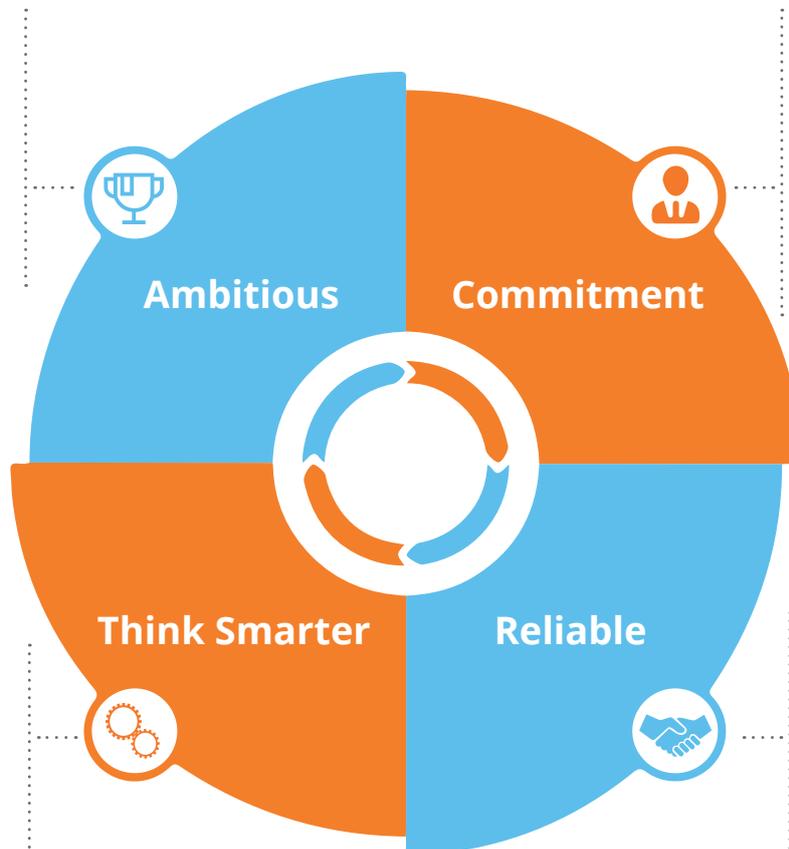

Geveko Markings develop, manufacture and supply road marking and safety materials, coatings and road repair products globally, to markets within the horizontal road and decorative markings. Our products include preformed, hot-applied thermoplastics, paints and plural components, glass beads, aggregates and traffic safety equipment.

- To be known as the leading manufacturer of high-quality road marking materials and systems.

- We work pro-actively to increase product quality, delivery reliability and customer satisfaction.

- Use the skills and systems available to us to ensure active cooperation in and between sites.

- We benchmark our quality activities to benefit from the accumulated knowledge and experience within Geveko Markings Group.

- Constantly improving the quality performance is a natural part of the daily business that engages all our employees.

- We are aware of the stated and unspoken needs and expectations from our customers and stakeholders.

- Our customers and stakeholders can expect high-quality work and standards across our business.

- We are transparent towards employees, customers and other stakeholders regarding our activities.

This policy is considered as a framework for the common quality objectives within the Geveko Markings Group.

In addition, each site within the Group will establish local quality goals and action plans based on local conditions.

We comply with binding obligations and relevant legislation and are committed to continuous improvement of our management system.
